Learn advanced Linux system administration skills in a real enterprise network environment with a cluster of dedicated servers and public services.

Project Doc: <https://dwag.me/project/homelab>

Solun

Secure online tool for encrypting/decrypting messages and sending them via links to colleagues.

Project Web: <https://msg.solun.pm>

Project Doc: <https://dwag.me/project/solun>

AniPic

Service that cuts up anime series, categorizes them, tags each frame via AI, and stores them in a large database. Searchable and filterable on a public website.

Project Web: <https://anipic.co>

Project Doc: <https://dwag.me/project/anipic>

Scraping Tools

Tool that acts as an API and collects content from popular online marketplaces like Ebay.

Project Doc: <https://dwag.me/project/scrapper>

Self Assessment

I am a creative software developer who has worked on some of the most interesting areas and developed web applications that make browsing more enjoyable for users. My values are centered on creating new things and taking on new challenges to push myself to always deliver the best I can.
